

# Ronin's Honour - UX/UI Menus

## Landing Page

- **Info Panel:** An informative panel providing essential details about game mechanics, rules, and bonus features to enhance player understanding and decision-making.
- **Continue Button:** A button that directs players from the landing page to the main game screen, encouraging them to start playing.

## Game Page

- **Game Screen:** The main screen where players experience the slot game, featuring reels, symbols, and interactive elements.
- **Logo:** An iconic image or text representing the game or brand, typically displayed prominently on the game screen for brand recognition.
- **Info Button:** A button allowing players to access additional information about the game, including rules, paytable, and bonus features.
- **Balance:** A display showing the amount of virtual currency or credits that players have available to wager in the game.
- **Bet Buttons:** Interactive buttons enabling players to adjust their bet amount per spin, typically offering different wagering options to suit various preferences and budgets.
- **Current Bet:** A visual indicator showing the amount of the player's current bet per spin, dynamically updated as the player adjusts their bet using the Bet Buttons.
- **Spin Button:** A button triggering the spinning of the reels, initiating gameplay and determining the outcome of each spin.
- **AutoSpin Button:** A button allowing players to set the game to automatically spin the reels for a predetermined number of spins, offering convenience for players who prefer a hands-free gaming experience.
